

Prevalence of Illicit Alcohol Outlets in Nairobi's Informal Settlements

Consumption of Illicit Brews*

Illicit alcohol outlets	39.5%
Moonshine (Chang'aa) outlets	45%

39.5%

is the estimated prevalence of illicit alcohol outlets in Nairobi's informal settlement

Average Quantity Consumed per Visit

47 OUT OF 119

Alcohol-selling outlets were at least selling some form of an illicit alcohol beverage

These findings reveal that out of the sampled 119 alcohol outlets, 47(39.5%) were selling some form of illicit alcohol.

The high density of such establishments significantly increases availability and exposure, worsening the public health crisis.
